

### **MFL intent.**

Our intent at Eyam primary school is to provide an adaptable and quality Modern foreign language education. We use a language course by ilanguages that has a strong focus on phonics using the Planetas fonéticos system and uses a “talk to writing approach”. Children will learn to decode the language, use cognates and develop problem-solving skills in order to acquire new understanding. These skills are transferable to any language learning. Our objective at Eyam is to help students achieve a level of Spanish where they can understand questions and respond in full sentences verbally. In addition to understand the written language and write sentences in Spanish. We aim to encourage a love of language and interest in the foreign culture. We emphasise the importance of foreign language learning and intercultural communication.
